Plumbing Piping

Under accessible kitchen sinks are required to be insulated. **HANDY-SHIELD®** Safety Covers comply with ADA/DOJ Standards for Accessible Design 606.5, Kitchen Sinks - 804.4; ICC A117.1, (sec. 606.6), Kitchens - 804.4, Residential Multi-Family 1003.12.4.4 and 1004.12.2.1. and Product Standards ASME A112.18.9 and ASTM C1822. Whether accessibility is required on a commercial or residential project these guidelines apply.

Fire Performance

Fire safety for both commercial and residential buildings is a critical design requirement and is provided for in ASTM C1822. It is especially vital for hospitals, assisted living, convalescent homes, schools, dormitories etc. where High-Risk Groups such as the Disabled, Children or the Elderly require assistance for egress. **HANDY-SHIELD®** Safety Covers offer a Superior Vinyl Fire-Rated Material that is tested to Building and Fire Code Approved ASTM E-84 /UL 723 and is rated "Class A Material" with a 25 Flame and 450 Smoke Rating meeting ASTM C1822 Type I, and IAPMO PS 94.

Increased Access and More Economical

HANDY-SHIELD® Safety Covers offers a complete line of under-sink solutions that are both economical and install quickly with Velcro. These covers eliminate the high cost of expensive custom cabinet materials and labor to cover piping.

HANDY-SHIELD® Safety Covers will increase under-sink access compared with other systems.

Superior Material with Color Choices

HANDY-SHIELD® Safety Covers are made from Vinyl Material that features a High-Gloss, Smooth-Finish Surface, Anti-Microbial, Anti-Fungal inhibitive properties and UV long-term, material protection. Your customers have four colors to choose from.
